QUANTITY ORDERED **PAIRS** _____ **SINGLES** _____

(SEPARATE ORDER FORMS ARE REQUIRED FOR EACH SIZE LAMP POST)

Please Note if Lamp Post's are Round, Octagonal or Square _____

CIRCUMFERENCE MEASUREMENT (diameter required for octagonal and square poles)

**The Bracket Mounting Collar should be a MINIMUM of 9' above street level
Recommended height is between 10' and 12' above street level**

**The Circumference measurement MUST be precise; we recommend that you use a cloth
tape or calipers for this measurement.**

**If the Lamp Post is the same circumference at both the top and bottom only one
circumference measurement is required. Measure at the EXACT point that the mounting
collar is to be attached to the Lamp Post.**

CIRCUMFERENCE MEASUREMENT _____

TAPERED POST MEASUREMENT (diameter required for octagonal and poles)

**If the Lamp Post is tapered or increases in size from top to bottom then two
measurements are required. Take the first measurement at the EXACT point that the
mounting collar is to be attached to the light pole. Take the second measurement
EXACTLY 10" BELOW the first or top measurement.**
